ONLINE HEARING TEST

VALIDATED ONLINE HEARING SCREENING TECHNOLOGY

hearDigits uses clinically-validated digits-in-noise technology for online hearing screening tests. The hearDigits widget can easily be embedded onto any healthcare service provider or retailer's website, with customized branding and user journeys.

End-users can take a free online hearing screening to determine their hearing status in 2 minutes. Retailers, researchers and healthcare providers can access the test results directly from our secure cloud-based data management system for referrals, follow-up consultations.

For a more customized hearDigits widget with a tailored user journey, please reach out to our sales team at sales@hearxgroup.com for a quote.

*Only available in the United States.

	Premium
Direct referrals and test monitoring in cloud-based Leads portal.	✓
Themes Toggle between a light and a dark version of the widget. Referrals can be turned on/off.	✓
Logo Determine whether you would like the hearDigits logo to appear on your widget. Select the images and icons custom to your preference, to best suit your widget.	✓
Fonts Select between 7 different font types available for the hearDigits widget.	✓
Color Customise your widget in terms of color, according to the clinic's look & feel.	✓
Text Edit and change the text presented on several windows of the widget.	✓
Privacy Policy Add your own privacy policy. Select your own image to be displayed with your contact details. Basic patient information can be captured before the result screen is displayed. The result screen can be customised with regards to image upload and button flow. The user has the ability to add a hyperlink post test to redirect to a specific URL.	✓
Annual Pricing	\$995
